

Many of those promoting Covid-19 have publicly stated that the world is overpopulated and that the world population must be reduced by 90%.

The danger of Covid-19 has been exaggerated to bring a world government, draconian regulations, a cashless society, compulsory vaccinations, health passports, and social credit (similar to China). The plan is part of UN Agenda 21, the New World Order and the Great Reset devised by the World Economic Forum. They do not intend to restore freedoms taken under the guise of Covid, it will only get worse.

Deaths from covid-19 have been massively exaggerated. How many people do you know who are sick or who have died? Probably none. The flu kills up to 650,000 people worldwide each year. This is considerably more than the actual number of deaths from covid-19. The coronavirus test is useless as it produces more false positives than actual positives. Healthy people are being told they are sick and must stay home.

Vaccines need to be tested for many years. If a covid-19 vaccine is produced in less than 10 years, there will be no long-term testing. Making a vaccine in a few months greatly increases the dangers. Some serious side effects do not appear for years after vaccination. Giving an untested vaccine to seven billion people (as planned with the covid-19 vaccine) will result in the death or serious illness of millions. Doctors are paid large amounts of money to vaccinate patients.

Patients who suffer serious side effects after vaccination with COVID-19 will not be able to take legal action for damages. In the United States, the government has paid more than US \$ 4 billion for vaccine injuries. The H1N1 flu vaccine led to lawsuits around the world.

New vaccines include DNA from chimpanzees. Moderna, championed by Bill Gates, admit in their own materials that "DNA vaccines have the risk of permanently changing a person's DNA."

Say "No" to the vaccines and closures
